

High School Biology Activity

Topic: Cell Structure & Function

Objective

Students explore and understand concepts related to cell structure & function.

Materials

- Biology textbook
- Notebook
- Chart paper
- Markers
- Internet access

Procedure

1. Introduce the concept of cell structure & function.
2. Discuss structure and functions.
3. Use diagrams or models for explanation.
4. Students draw and label diagrams.
5. Present and explain findings.

Observation / Notes

Observation	Notes

Discussion Questions

- Why is cell structure & function important?
- What are its main functions?
- How does it affect living organisms?
- What careers relate to this topic?

Extension Activity

Create a labeled diagram or model showing cell structure & function and present it.

Cell Structure & Function Diagram
