

High School Biology Activity

Topic: Homeostasis

Objective

Students explore and understand concepts related to homeostasis.

Materials

- Biology textbook
- Notebook
- Chart paper
- Markers
- Internet access

Procedure

1. Introduce the concept of homeostasis.
2. Discuss structures and functions.
3. Observe diagrams or models.
4. Students draw and label structures.
5. Present and explain findings.

Observation / Notes

Observation	Notes

Discussion Questions

- What is the importance of homeostasis?
- How does it function in living organisms?
- Why should we study this topic?
- What careers relate to this area?

Extension Activity

Create a labeled model or diagram explaining homeostasis and present it.

Homeostasis Diagram
