

High School Biology Activity

Topic: Nervous System

Objective

Students explore and understand concepts related to nervous system.

Materials

- Biology textbook
- Notebook
- Chart paper
- Markers
- Internet access

Procedure

1. Introduce the concept of nervous system.
2. Discuss structures and functions.
3. Observe diagrams or models.
4. Students draw and label structures.
5. Present and explain findings.

Observation / Notes

Observation	Notes

Discussion Questions

- What is the importance of nervous system?
- How does it function in living organisms?
- Why should we study this topic?
- What careers relate to this area?

Extension Activity

Create a labeled model or diagram explaining nervous system and present it.

Nervous System Diagram
