

# High School Biology Activity

**Topic:** Photosynthesis Process

## **Objective**

Students explore and understand concepts related to photosynthesis process.

## **Materials**

- Biology textbook
- Notebook
- Chart paper
- Markers
- Internet access

## **Procedure**

1. Introduce the concept of photosynthesis process.
2. Discuss structure and functions.
3. Use diagrams or models for explanation.
4. Students draw and label diagrams.
5. Present and explain findings.

## **Observation / Notes**

Observation	Notes

## **Discussion Questions**

- Why is photosynthesis process important?
- What are its main functions?
- How does it affect living organisms?
- What careers relate to this topic?

## **Extension Activity**

Create a labeled diagram or model showing photosynthesis process and present it.

## Photosynthesis Process Diagram
