

High School Biology Activity

Topic: Plant Reproduction

Objective

Students explore and understand concepts related to plant reproduction.

Materials

- Biology textbook
- Notebook
- Chart paper
- Markers
- Internet access

Procedure

1. Introduce the concept of plant reproduction.
2. Discuss structures and functions.
3. Observe diagrams or models.
4. Students draw and label structures.
5. Present and explain findings.

Observation / Notes

Observation	Notes

Discussion Questions

- What is the importance of plant reproduction?
- How does it function in living organisms?
- Why should we study this topic?
- What careers relate to this area?

Extension Activity

Create a labeled model or diagram explaining plant reproduction and present it.
