

High School Biology Activity

Topic: Respiratory System

Objective

Students explore and understand concepts related to respiratory system.

Materials

- Biology textbook
- Notebook
- Chart paper
- Markers
- Internet access

Procedure

1. Introduce the concept of respiratory system.
2. Discuss structure and functions.
3. Use diagrams or models for explanation.
4. Students draw and label diagrams.
5. Present and explain findings.

Observation / Notes

Observation	Notes

Discussion Questions

- Why is respiratory system important?
- What are its main functions?
- How does it affect living organisms?
- What careers relate to this topic?

Extension Activity

Create a labeled diagram or model showing respiratory system and present it.
